

Quick Start Guide

IP Camera

1 Camera Connection Diagram

Attention: There are two connection modes: 1. For non-PoE router, pls connect the camera by a PoE switch or a PoE injector. 2. For a POE NVR, als connect the camera directly to the POE NVR, then follow the below steps.

2 li

Bullet Camera Installation

1.Ceiling Mounting

Insert three expansion bolts in place into the ceiling and fix the equipment with three mounting screws.

Completion of Installation

Vandal-Proof Dome Camera Installation

1.Ceiling Mounting

2. Apply the position sticker to the desired camera mounting position.

Cover Component

Remove the cover component by loosening the three locking screws with the included hex wrench.

2.Use the position indicated on the position sticker to drill the holes needed to mount the camera base. Insert the expansion both into the holes. Match the base's mount openings to the expansion boths position, then place the mounting screws through the base's mount opening into the expansion bolt. Tighten the mounting screws to ensure the camera base mounted securely.

* Place the cover component back onto the base.

Please make sure the locking screw position on the cover component matches the locking post on the base.

* Tighten the locking screws after the cover component is in the correct position.

Add Camera to the App

There are two methods to install the App

Search for "GWCAMVIEW" in App Store or Google Play

Scan the QR code below to download the App.

Change Camera Settings

1. Open "GWCAMVIEW": you will see the following interface

✓ Device Device

information then click save

* Please refer to "Help" section for detailed instruction.

2.If add the device successfully you will see the following interface

3. Delete a Device

Under "Device", slide the selected device to the left and click "Delete"

1. Find and open "Device Config Tool" in the CD. It will search all the available devices on your local network
