

How to add GW55 series NVR and GW95 series XVR to VMS client and start live view.

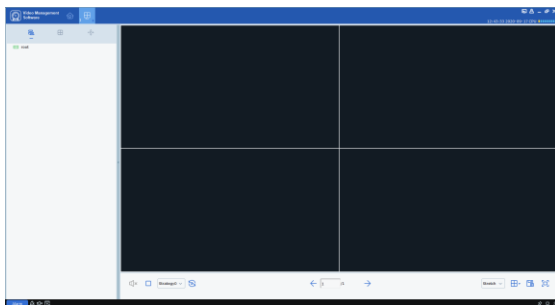

1. Install and download VMS client: [Link](#)
2. After installation, you will need to create a password:

The screenshot shows the 'Initialization' window with a progress bar at the top. The first step, '1.Password Setting', is active and highlighted. The instructions state: 'Please set admin password at first installation.' There are two input fields: 'Password' and 'Confirm Password'. Below the 'Password' field is a 'Password Strength' indicator with three segments. At the bottom, there is an unchecked checkbox labeled 'Auto Login After Registration' and a 'Next' button.

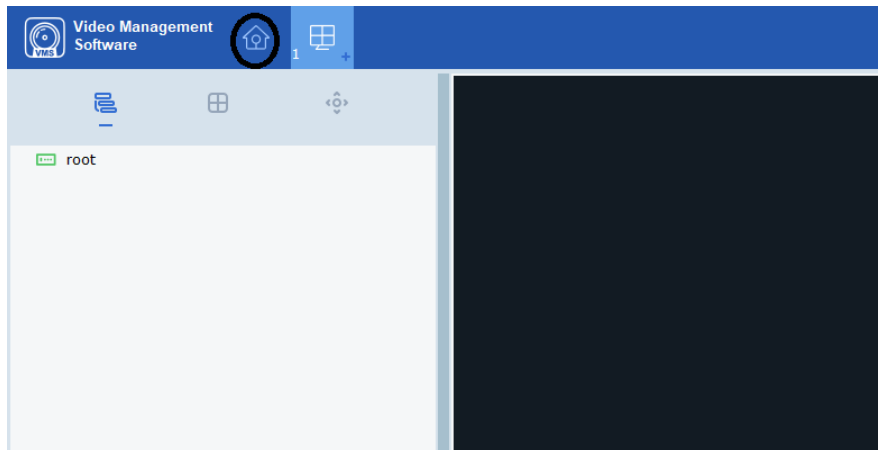

And set up security questions. Click on Finish to complete the step

The screenshot shows the 'Initialization' window with the progress bar updated. The second step, '2.Password Protection', is now active and highlighted. The instructions state: 'Please set security questions.' There are two sets of questions. 'Question 1' has a dropdown menu showing 'What is your nickname?' and an 'Answer' text field. 'Question 2' has a dropdown menu showing 'When is your father's birthday?' and an 'Answer' text field. A 'Finish' button is located at the bottom right.

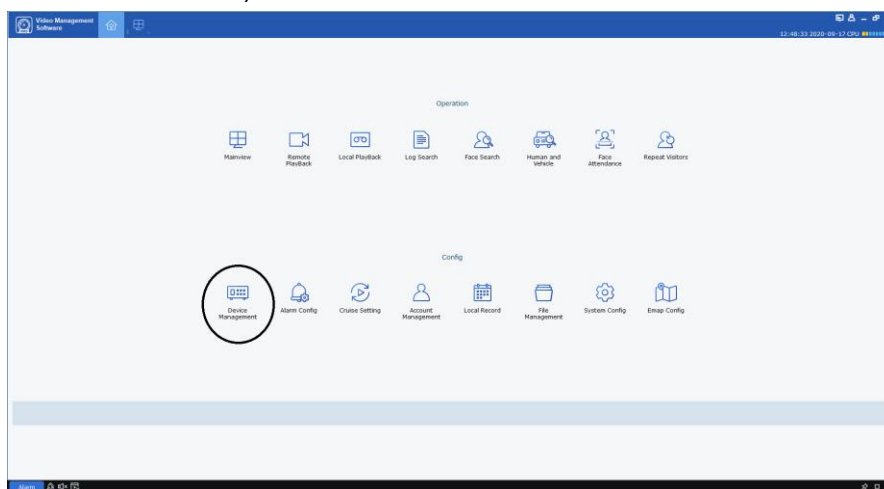

3. After completing the above step, the VMS client will bring up the main view:

4. From the main view screen, click on the “” icon to bring up the main menu:

5. From the main view, click on “”

6. From the “Device Management” section, there are two ways to add a device; manual or auto search.
- a. To auto-add a device, click on “Auto Search”, and then click on “Search”. If the device is connected to the network, you will see it listed

No.	Device Name	IP	Port	ChannelNum	Mac address	Version	P2PID	Operation
1	GW5516NPG	192.168.10.86	9000	16	00-23-63-7A-E2-79	V8.1.0-20200811		 

Clicking on the icon below P2PID will show the P2P ID. Click on the “” will add the

device using local IP address and will prompt you to enter the username and password for your NVR/XVR

The 'Add Device' dialog box features a blue header with an information icon, the title 'Add Device', and a close button. Below the header, there are two input fields: one labeled 'user' and another labeled 'password'. At the bottom right of the dialog is a blue button labeled 'Add'.

Once the device is added, it will show under “All equipment”. From here, you can edit the device by clicking on the “” icon and modify it to connect via P2P ID if you wish to. Switching the login type to P2P ID will automatically fill in the P2PID field.

The screenshot shows the 'All equipment' tab in the Video Management Software. It displays a table with the following columns: No., Device Name, IP/ID, Device Type, Protocol, Status, Port, Channel/Room, P2PID, and Operations. A single device is listed in the table.

No.	Device Name	IP/ID	Device Type	Protocol	Status	Port	Channel/Room	P2PID	Operations
1	GW5518NPG	192.168.10.86	GW5518NPG	Private		9000	15

- b. To manually add a NVR, click on the “+” icon

Input the required information in the next screen then click on “Add”

The 'Add Device' dialog box is shown with the following fields and options:

- Device Name:** A text input field.
- Login Type:** A dropdown menu with 'IP' selected.
- IP/ID:** A text input field.
- Protocol:** A dropdown menu with 'Private' selected.
- Media Port:** A text input field.
- User Name:** A text input field.
- Password:** A text input field with a visibility toggle icon (an eye) on the right.
- Buttons:** 'Add' and 'Cancel' buttons at the bottom.

“Device name” is a name for the device.

“Login type” can be “IP” or “P2PID”,

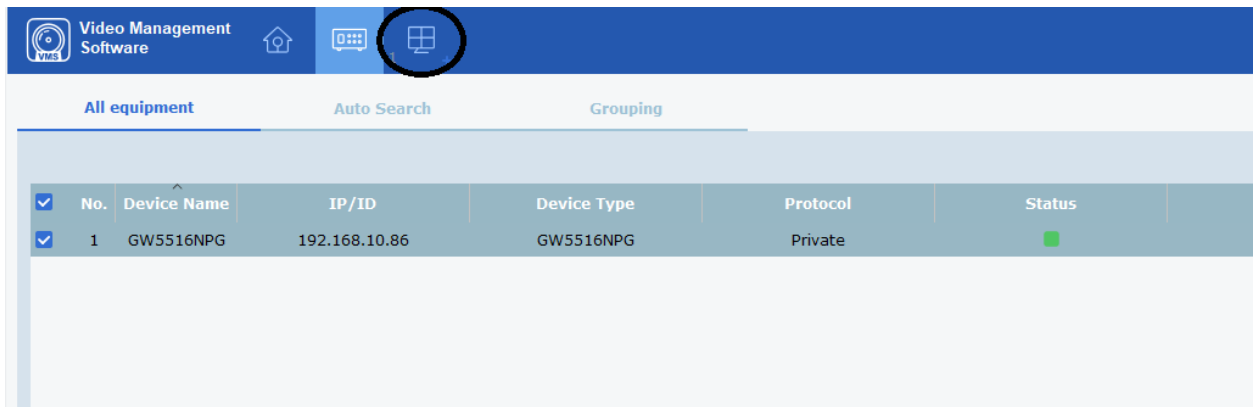

“IP/ID” will depend on the login type.

“Media port” by default should be 9000

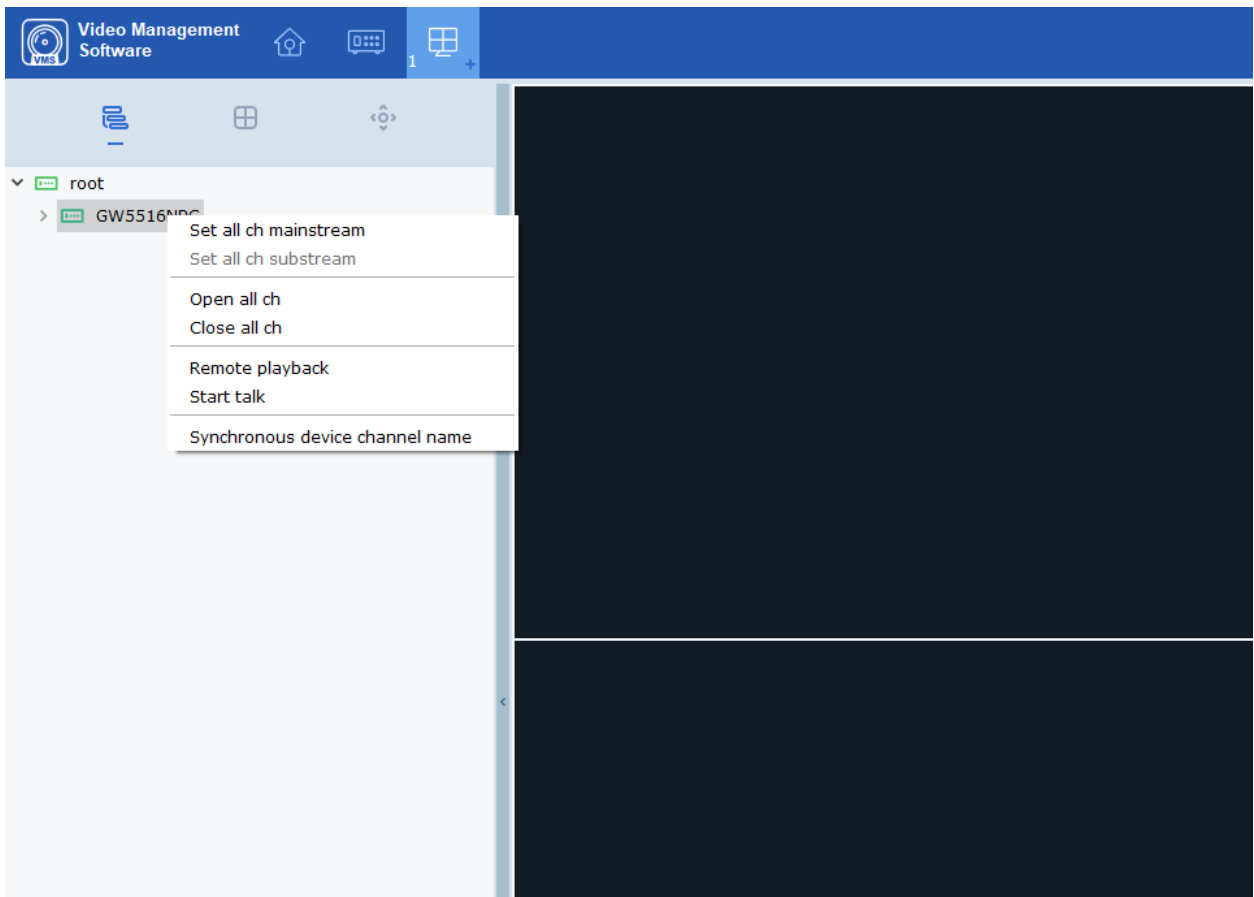

“User name” is the login username for your NVR

“Password” is the login password for your NVR

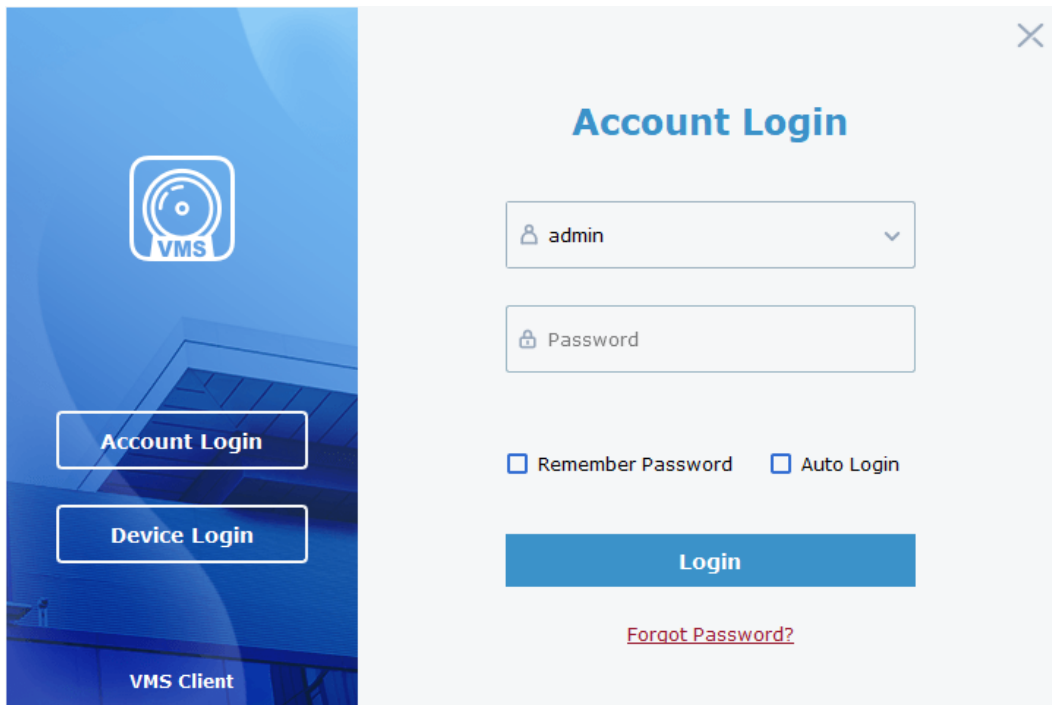

7. After the device has been added, click on “Main View”

8. Right-click on the device listed on the left hand side and choose “Open all ch”. You should see all channel’s live stream open.

9. After you close the VMS client, the next time you open the client you will be asked to login. The login information is the one you created in step 2. You can choose “Auto Login” to avoid this step:

10. After login, click on main view should automatically start the cameras you opened from your last session.
